Title: TRANSISTOR AND METHOD FOR FABRICATING THE SAME

November 8, 2002

RECEIVED HOLL ROOM

PRELIMINARY AMENDMENT

Hon. Commissioner of Patents Washington, D.C. 20231

Sir:

In response to the Office Action mailed October 23, 2002, please consider the following remarks submitted with the Request for Continued Examination for the above-noted application.

IN THE CLAIMS:

1. A transistor comprising:

a device isolation film formed on a semiconductor substrate, the device isolation film having a groove that exposes a portion of the semiconductor substrate defining an active region and having a substantially vertical profile with respect to the exposed portion of the semiconductor substrate;

a gate electrode structure formed in a central portion of the active region of the semiconductor substrate and separated from the device isolation film, wherein the gate electrode structure further comprises:

a stacked structure of a gate oxide film, a first gate electrode and a second electrode,
